Dr. Mosby Payne, of New York is visiting friends here.

Mrs. John Scruggs is a patient at a hospital in Lynchburg. We wish for her a speedy recovery.

FORDOMATIC OUTGOES THEM ALL!

Practically drives itself! Fordomatic thinks for you. It smoothly and automatically provides a countless number of drive ratios through which engine power is fed to the rear wheels.

You're boss every second. Step down on the accelerator and you get an extra spurt of power for hill climbing and passing. Going downhill you can shift to low of any speed for extra engine braking.

Easier rocking! It's even easier to "rock" out of sand, snow or mud with Fordomatic than with Conventional drive. Just move the selector back and forth between low and reverse.

It's a gas-saving powerhouse! Fordomatic's automatic intermediate gear provides smooth, fast, economical "getaway" without wasteful engine racing. Use no more gas than the saving! Conventional Ford.

Combine best features of previous drives! Fordomatic gives you automatic drive in one—a torque converter for smoothness—and automatic gears for get-up-and-go.

Come in and "Test Drive" the FORDOMATIC FORD

NEW BUSINESS MEANS BETTER LIVING . . .

THE NORFOLK AND WESTERN IS HELPING YOUR COMMUNITY AND YOUR STATE TO GROW AND PROSPER

Every new or expanded industry in the six-state territory* served by the Norfolk and Western Railway means MORE BUSINESS and BETTER LIVING for the people and communities of this great and growing region.

During the ten year period 1941-50, a total of 2,506 new industries and additions to existing plants were established along the line of the N. & W. and tributary to the territory. They were built at a capital investment of \$1,006,934,028 and employed 279,901 persons.

The Norfolk and Western is proud to have had a hand in helping to convince industrialists of the many outstanding advantages in this thriving region by assisting state and local Chambers of Commerce and other progressive minded groups, or by working directly with manufacturers seeking suitable plant sites.

For more than half a century, the railway has maintained an efficient Industrial and Agricultural Department, staffed by specialists, who are charged with the specific duty of working for the industrial and agricultural development of the territory. Their files are filled with up-to-the-minute data on this area, including raw

materials, power, water, labor supply, available plant sites, etc. This information is constantly being presented to manufacturers and other business men throughout the country. In short, members of the N. & W. Industrial and Agricultural Department are "salesmen" for the territory.

The area served by the railroad has had a healthy growth during the past ten years. The Norfolk and Western has faith in the continued growth and progress of the communities along its line, and will continue to work vigorously to bring in new industries, which mean more business, more jobs and better living in this great and growing region.

Faith in the Land of Plenty — and down-to-earth evidence that it is a GOOD place for industry — is seen in the 2,506 new industries and additions to plants, representing a capital investment of more than a billion dollars, and employing over 279,000 more people, that have located in this territory during the last ten years. This is proof that manufacturers outside the territory — and those already in the area — know the Land of Plenty is great and growing — and that their business can grow along with it.

Norfolk and Western Railway

*Virginia, West Virginia, Ohio, North Carolina, Kentucky, Maryland — advertised by the N. & W. as the Land of Plenty.
